EXPERIENCE

Adtip Pvt Ltd *May 2025 – July 2025*
Full Stack Developer Intern

- Developed and integrated REST APIs to transform backend data into structured formats, enabling real-time reporting across business operations.
- Built efficient data pipelines for application analytics and processing workflows, reducing data latency for downstream consumers.
- Collaborated in an Agile team using Git workflows and code reviews to deliver scalable features across development sprints.

PROJECTS

OfferPath – Job Application Intelligence Platform *Python, Flask, PostgreSQL, spaCy, Scikit-learn*

- Developed a full-stack job application tracker with an NLP-powered resume analyzer using spaCy NER and TF-IDF cosine similarity to generate ATS match scores.
- Built a keyword extraction pipeline using Scikit-learn TF-IDF and NER to identify missing skills and highlight resume skill gaps.
- Implemented interview question prediction using prompt engineering and Gemini API, along with a Kanban dashboard and Chart.js analytics for tracking application funnel conversion.

NeuroLearn – AI-Powered Adaptive Tutoring Platform *FastAPI, React.js, Scikit-learn, Gemini API*

- Developed an adaptive learning platform that personalizes quizzes and study plans based on student performance and knowledge gaps using Deep Knowledge Tracing.
- Implemented a FastAPI backend with JWT authentication, REST APIs, and role-based access for students and teachers.
- Created an adaptive quiz engine using Google Gemini API to generate Bloom's Taxonomy-based questions and mastery explanations.
- Integrated a spaced repetition scheduler based on the SM-2 algorithm to support personalized revision.
